HOW WE ENGAGE

Prime Contractor

We hold the award, assemble and vet the subcontractor team, and manage performance through closeout.

Teaming Partner

We join the pursuit before the bid, bringing certified small business status and project management capacity.

Subcontractor

We take a defined scope under your prime contract and manage it to your schedule, reporting, and compliance requirements.

Project Management Support

We step into an active project to take over planning, scheduling, coordination, and reporting.

WHERE WE FIT

- A set-aside or sole-source opportunity calls for a WOSB or SDVOSB
- A prime needs certified small business participation that does real work, not pass-through
- A project needs one party accountable for scope, schedule, and budget
- The project team is stretched and reporting has started to slip

Wall Street experience behind every budget and report. Numbers built to survive scrutiny.
